SECURITY SYSTEMS

The most basic definition of any security system is found in its name. It is literally a means or method by which something is secured through a system of interworking components and devices. Nowadays security has become an essential and mandatory requirement for every entities, no matter what level they are dealing with. Sama Integrated Smart Systems deal with the security needs of our customers. We are expert at Security Services such as CCTV Surveillance, Access Control System, Intercom, Time Attendance Systems, Gate Barriers, Biometric Readers, Etc.

CCTV SYSTEM

A CCTV system allows the use of video cameras to monitor the interior and exterior of a property, transmitting the signal to a monitor or set of monitors. CCTV utilizes the latest digital technology to monitor access to secure areas, unauthorized activities, theft or criminal damage and personal safety or even provide a remote response to an intrusion.

ACCESS CONTROL SYSTEM

From single store to chain of retails or the whole edifice Access Control Systems (ACS) is designed to control Access for Employees and visitors by utilizing multiple technologies such as swipe cards, proximity cards, PIN entry keypads, and hardware to provide an effective solutions for a single or multiple sites.

INTERCOM SYSTEM

Intercom systems are used for making buildings, apartments, villas, or workplaces safer by house owners. Thanks to intercom systems, it is possible to increase both security and comfort in any property. These systems have the feature of storing historical data. In this way, the data can be reached by these systems after a long time.

ATTENDANCE SYSTEM

Time Attendance System allows the company to manage, monitor employee entries, exits, breaks, absence and leaves. Time Attendance system enables to prepare a detail report of employees who are not holding up to your standards of employment.

GATE BARRIERS

Gate Barriers are generally employed in residential areas and parking premises for safe and authenticated access. Gate Barriers control the vehicle access at entry, exit gates. They consist a fixed metal block that carries of a pole which operates electronically and blocks the unidentified vehicles at entry, exit gates, and allows them after proper authentication.

LOW CURRENT SYSTEMS

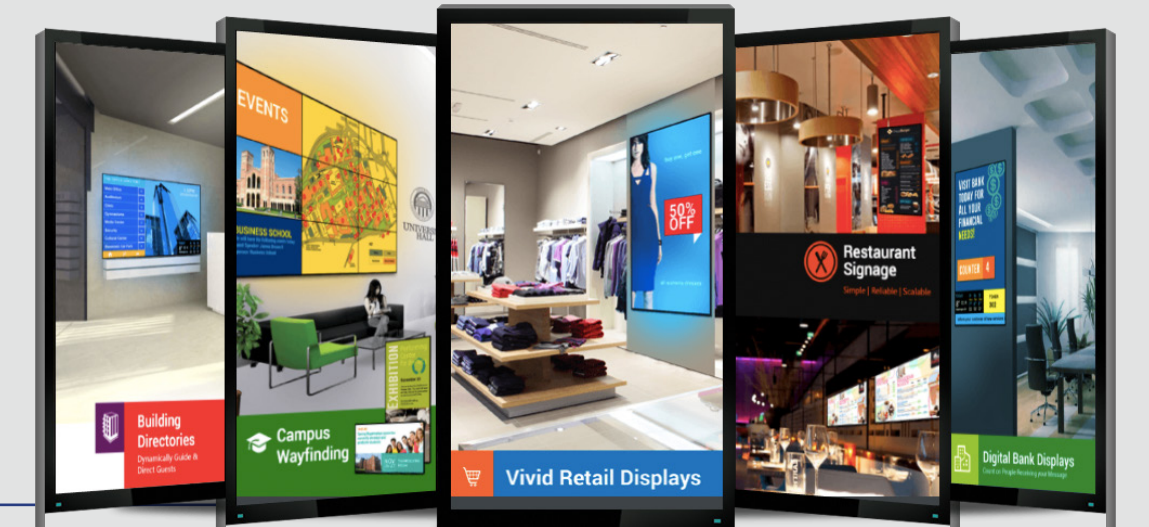

Sama Integrated Smart Systems offers the latest equipment in Public Address, Digital Signage Solution, Intercom solutions. We also offer reliable and creative solutions backed with the latest technology & excellent customer service

PUBLIC ADDRESS SYSTEM

Public Address System (PA system), is an electronic sound amplification and distribution system with a microphone, amplifier and loudspeakers, used to allow a person to address a large public, for example for announcements of movements at large and noisy air and terminals, warehouse, factory etc.

DIGITAL SIGNAGE SOLUTION

Electronic information display is now an important resource for business, government education and organizations throughout the public sector. Sama Integrated Smart Systems offers a range of complete solutions from flat screen displays, stand-alone kiosk units and signage software to the design and installation of complete signage networks.

NETWORK & TELECOMMUNICATION

Sama Integrated Smart Systems provides structured cabling solutions, network installation and network maintenance. Our specialist design and installation team brings to your project a perfect blend of high technology and Latest fashioned work ethics and workmanship. We also deal with IP telephony, high speed internet solutions, and wireless solutions.

STRUCTURED CABLING SYSTEM (SCS)

Structured cabling systems are becoming increasingly complex and sophisticated, meeting greater demands and workloads. With emerging connectivity developments in hardware and software, structured cabling system tolerances are becoming ever more stringent. A networks physical.

infrastructure must incorporate security and integrity into its inherent design, as well as the ability to adapt to changes in technology. Sama Integrated Smart Systems experienced with a dedicated team provides an end-to-end service from design to implementation. We designs and builds cabling infrastructure systems that support multiple voice, data, video and multimedia systems.

NETWORK SWITCHES

A network switch is equipment that allows two or more IT devices, such as computers, to communicate with one another. Connecting multiple IT devices together creates a communications network. Compute, print, server, file storage, Internet access, and other IT resources can be shared across the network.

WIRELESS SOLUTIONS

A wireless network is a computer network that uses wireless data connections between network nodes. Wireless networking allows homes, telecommunications networks and business installations to avoid the costly process of introducing cables into a building, or as a connection between various equipment locations.

IP & HYBRID PABX

Hybrid IP PBX systems, also known as a digital hybrid IP-PBX system, VoIP PBX, or IP based PBX system, combine two different telecom systems commonly used by small businesses, educational institutions, and professional offices: the traditional PBX phone system and VoIP technology.
